EXPERIENCE

NIBIZ Soft, House 11 Rd 3A, Dhaka 1230 — *Software Developer*

January - 2024

As a Software Developer at NIBIZ Soft, I have developed and deployed E-commerce MLM business architectures, custom ERP applications, and tailored CMS solutions. My expertise includes creating AI models for background removal and automatic face detection in passport photos using Flask, Rembg, and OpenCV. I also have experience building and maintaining raw PHP websites to meet diverse client needs.

Seo Exparte Bangladesh LTD, Bogura —Web Developer & Team Leader Of Web Development

January-Dec 2023

Working on Different ERP System Applications

At Seo Exparte Bangladesh LTD, Bogura, from May to December 2023, I specialized in developing ERP systems using Laravel, MySQL, JavaScript, and jQuery. My role focused on creating scalable, user-friendly solutions tailored to client needs. Collaborating with cross-functional teams, I gathered requirements, designed solutions, and implemented features to streamline business processes.

Sherpur IT LTD, Sherpur — *Junior Programmer*

June - 2020 - Dec - 2022

Software Bug Fix Specialist

During my tenure at Sherpur It LTD from 2020 to 2022, I was responsible for diagnosing and resolving errors and bugs across various web projects. My role involved meticulous problem-solving and troubleshooting to identify the root causes of issues, followed by implementing effective solutions to ensure the smooth functioning of the websites.EDUCATION

SHERPUR INSTITUTE OF SCIENCE AND TECHNOLOGY (SIST), Sherpur — *Diploma In Computer Science*

Jun 2019 - December 2023

This diploma program offered a focused study in computer science, encompassing key subjects like programming languages, data structures, and algorithms. It provided hands-on training and theoretical understanding to

PROJECTS

MLM Project: E-Commerce MLM Platform

The E-Commerce MLM Platform is a robust web-based system designed to support multi-level marketing businesses. It provides a seamless experience for managing sales, tracking referrals, and scaling operations, complete with custom ERP integrations and a user-friendly interface.

AI Project: PhotoPerfect

PhotoPerfect is an AI-powered solution designed to automate the removal of background photos and cropping of passport photos. Utilizing advanced algorithms in Flask, Rembg, and OpenCV, ensures precise face detection and image optimization for official use.

ERP Project: Trainee Management System

Designed and implemented a system for managing trainees, including registration, tracking progress, and generating reports to monitor their development.

ERP Project: NGO Management System

I have created a comprehensive management system for non-governmental organizations (NGOs), facilitating efficient administration, donor management, and project tracking.

CMS Project: Book Your Data (Database Selling)

Established an online platform for selling databases, providing users with access to a wide range of data sets for various purposes. Users can buy databases by using Cryptocurrency.

ERP Project: NFC Intro Card Read/Write & User Profile

Designed a system utilizing NFC technology for reading/writing introductory cards and managing user profiles, enhancing user experience and security.

ERP Project: Salon Booking System Worldwide

Developed a global booking system for salons, allowing customers to schedule appointments online and providing salon owners with tools to manage bookings and staff schedules efficiently.

EXPERTISE:

- Web Development.
- App Development(Flutter and Java).
- Restful Api Development.
- Data Structures & Algorithms.
- Object-Oriented.
- SEO
